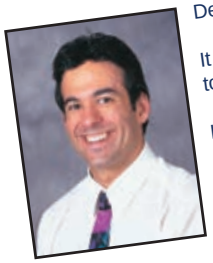
Sagemcom



Dear Colleague,

It is my great pleasure to welcome you to ITEXPO at the Miami Beach Convention Center. I would like to thank you for making ITEXPO the premier event within the technology and communications field.

ITEXPO is well known as the "communications and technology marketplace" due to its history of fostering true business opportunities. ITEXPO is the world's largest and longest-running B2B communications and technology trade show. This iteration of the conference in Miami features educational tracks that cover the issues and opportunities that users and providers of today's sophisticated communications solutions face.

Throughout the three-day event, hundreds of industry thought leaders and true practitioners will share their insights on cloud computing and communications, customer engagement, mobility, unified communications and more.

We're extremely excited to return to Miami, Florida, and we are certain you will enjoy the venue, the hotels, the dining and entertainment, and of course, the extraordinary content featured in ITEXPO programs.

There are lots of exciting events collocated with this edition of ITEXPO: Asterisk World, ChannelVision Expo (CVx), Cloud4SMB Expo, LatinComm Conference and Expo, M2M Evolution, and Super Wi-Fi Conference.

You can attend a variety of educational workshops (ITEXPO's FREE Workshops include: Asterisk 1-2-3: The Essential 1-Day Asterisk Training Course, Ingate's SIP Trunking-Unified Communications Seminars, Microsoft Lyn Partner Solutions Pavilion, StartupCamp7: Comms Edition, Telecom Reseller Week and Telefónica's Data Center Tour), engage with amazing speakers, and participate in informative sessions for communications technology users, experts and suppliers.

We are very grateful to you for committing your time and resources to join us, and are confident you will find the ITEXPO experience extremely worthwhile.

There are many activities taking place over the next few days. Please take a moment to review and use this directory as a guide to make sure you don't miss what's most important to you. For times and locations, please seen the Agenda-At-A-Glance on pages 12-14.

Once again, I'm very pleased that you're here to experience and contribute to ITEXPO. As always, please contact myself or a member of the TMC staff know what you think of the event. You'll see us around all week and you can also stop by the Registration Desk to give us your valued feedback. Enjoy ITEXPO!

Rich Tehrani
CEO and Conference Chairman
TMC

Join Me for a Special Panel Discussion:
2013 "Age of Acceleration: Tipping Point"
Thursday January 31, 9:00am - Room B217/B218
This year is already shaping up as a tipping point, where long term success or failure is likely to be determined, and a new normal is emerging, characterized by one constant: accelerating change.

Join Carl Ford, Larry Lisser, Phil Edholm, Erik Linask and myself for a lively interactive session that covers what you would like to know about this constant evolution: BYOD, ubiquitous mobility, big data, impact of cloud, the customer experience imperative, business process automation and optimization, security, emerging technologies like WebRTC, pervasive video, and HTML5, and anything else you have questions about.

Empowering your global business.

From Beijing to London, Miami to Madrid, Sao Paulo to Paris, we have it covered. Present in over 40 countries and offering services in over 170, we are everywhere you need us to be, delivering mobility, fixed voice and data, and IT solutions for our MNC customers.

Miami KeyCenter™, as the focal point for companies doing business between the US, Latin America, Europe and Asia Pacific, is part of an interconnected series of Telefónica Data Centers worldwide. Using our fully owned and managed global IP and Data Center network, we are able to provide unique seamless services across multiple geographies.

Visit us at **Booth #529** to learn about the new partner program and discover how technologies such as Cloud and M2M can help transform your organization.

Telefónica

www.globalsolutions.telefonica.com/multinational
www.us.telefonica.com

With a presence in more than 40 countries, **Telefónica Multinational Solutions** serves hundreds of multinational organisations, growing in emerging markets like China, Brazil and Mexico, as well as established ones across Europe and the USA.

Our customer-centric approach is all about being where our customers are, and providing the services they need. We have the scope, expertise and scale required to ensure that all the parts of your global business are always connected.

We'll work with you to develop and implement a comprehensive communications strategy to achieve your business objectives, however ambitious. With that in mind, our value proposition is underpinned by four key pillars which, when combined, will provide you with a total service solution.

In short, it's a more productive way of working which is designed to help your business thrive.

Now, as a member of the **Telefonica Channel Partners Program,** you will have the support and access to one of the most prestiged and recognized data center networks and international worldwide services. The program will assist you with all the required marketing materials, trainings and tools that will empower your business to deliver a state of the art service. **Join us at Booth #529.**

Telecom RESELLER WEEK

Free for All Attendees • Telecom Reseller Theater on Expo Floor

Participate in Telecom Reseller Week
January 30 – February 1, 2013 at ITEXPO
FREE ITEXPO Workshop for Resellers and Agents

Telecom Reseller Week provides you with a forum for you to learn about cutting edge new solutions you can represent, to meet with many new potential partners, and to study proven sales techniques to help improve your team's performance.

This seminar teaches attendees how to effectively sell IP Communications equipment & services, with proven tips and best practices for addressing the challenges resellers face in today's economy. Learn about more new technologies, meet with even more potential partners, and gain valuable insight into how to increase sales right now. Prominent telecom vendors are coming to demonstrate their products, and present their solutions directly to you!

Featured Presenter: Gary Audin

Gary Audin has more than 40 years of computer, communications and security consulting and implementation experience. He has planned, designed, specified, implemented and operated data, LAN, WAN, and telephone networks. These have included local area, national and international networks as well as VoIP and IP convergent networks in the U.S., Canada, Europe, Australia, Caribbean and Asia.

The Voice of Unified Communications and Collaboration

Moving to Lync
January 30 – 5:30 PM • January 31 – 12:30 PM

Many enterprises have or are looking to implement Microsoft Lync. Or the enterprise may be upgrading from Office Communications Server (OCS) to Lync. No matter the path taken, Lync has its promoters and detractors who blog on the ease and difficulties of implementing a Lync system, software and services. Connecting Microsoft's Lync to SIP trunks and SIP qualified devices is a matter of interoperability. Both Microsoft and the SIP vendors/providers need to participate in a thorough structured test to validate their interoperability.

Successful SIP Trunking
January 30 – 6:30 PM • January 31 – 1:30 PM

If there is any theme in IT today, it is a flat or reduced the IT budget. One budget candidate is using SIP trunking and retiring the old T1 and PRI carrier connections. SIP trunking can in most cases produce enough savings to warrant the change. The proliferation of SIP trunking makes the bandwidth calculations for those SIP trunks an issue that the IT organization must resolve. Too much capacity and money is wasted. Too little capacity and calls will be blocked, callers will abandon the call, the enterprise agents will be less productive, and the enterprise's reputation for service may be harmed.

Moving Beyond UC Project Barriers
January 30 – 7:00 PM • January 31 – 2:30 PM

You are ready to consider Unified Communications. Will it be plug-and-play or will there be barriers to be surmounted before a successful implementation can occur? Many technologists focus on the products and services, but this does not get at the heart of UC. UC is a change in the way business is done. It is not technology delivered to the user with the user imagining how to be productive with UC. Many other non-technical factors must be dealt with before UC will deliver its promise.

Is the Cloud Right for You?
January 30 – 6:00 PM • January 31 – 3:30 PM

You are ready to consider Unified Communications. Will it be plug-a nd-play or will there be barriers to be surmounted before a successful implementation can occur? Many technologists focus on the products and services, but this does not get at the heart of UC. UC is a change in the way business is done. It is not technology delivered to the user with the user imagining how to be productive with UC. Many other non-technical factors must be dealt with before UC will deliver its promise.

Asterisk 1-2-3: The Essential 1-Day Asterisk Training Course – Free for All Attendees

Hosted By

digium
The Asterisk Company

The Asterisk 123 Seminar is intended to provide a well rounded and informative introduction to the Asterisk Project. All are welcome! Whether you are managing a team deploying an Asterisk implementation, evaluating potential replacements for a legacy telephony solution that's on its last leg, or just a general Asterisk "newbie" excited to learn what Asterisk is capable of, then this talk has something to offer you. This all-day seminar is broken into multiple sessions, beginning with background information such as the history of Asterisk, followed by methods of installing Asterisk and examples of fundamental configuration for call flow and features such as Voicemail and IVR. The lecture will immediately be followed by a Question and Answer Session.

Room B117

Asterisk 1-2-3 Agenda:

Session 1 (9:00am to 10:35am)

- What is Asterisk?
- Who created it, and why?
- What can Asterisk do?
- How does Asterisk get deployed?
- The architecture of Asterisk

Session 2 (11:00am to 12:15pm)

- Three ways of installing Asterisk
- Compiling Asterisk from source code
- Getting around on the Asterisk command-line interface
- Starting and stopping Asterisk
  Introduction to the Asterisk dialplan
- A simple Hello World dialplan

BREAK

Session 3 (1:45pm to 3:00pm)

- Connecting SIP phones to Asterisk
- Dialing phones from the dialplan
- Dialplan application
- Voicemail
- Dial-by-name directories
- Auto-attendands, IVRs, and Voice Menus
- Recording audio prompts
- Audio conferencing

Session 4 (3:30pm to end)

- Adding logic to the system
- Variables
- Expressions
- Conditional Branching
- Question and Answer session

Communicate Better

For Exhibitor and Sponsorship Information contact Joe Fabiano at jfabiano@tmcnet.com • 203.852.6800 Ext. 132

Still using POTS for fax? You can stop now.

Smart ATA™ is the only ATA that really works for FoIP. Here's why:

- It's the only ATA that makes **reliable outbound calls into carrier networks**.
- It's the only ATA that delivers **reliable G.711 faxes, including multiple-page faxes**.
- It's the only ATA that **supports T.38 with V.34**.

Skeptical? We thought you would be. Come by booth #612 and find out more.

Smart ATA, available from NetGen Communications, features Commetrex' patent-pending Smart FoIP® technology.

Order online at **www.smartata.com**.

Commetrex is also featuring FaxTap for SIP, the tool you've been waiting for to **diagnose FoIP problems in your network**, and it's great for lawful intercept applications.

Switchvox® is the best communications

Switchvox offers enterprise-class features at a price you can afford.

Digium's Switchvox® system is more than a phone system – it's the Unified Communications system that integrates all office communications, including phone, fax, chat and web mashups. SMBs that want to do more than just talk can count on Switchvox to help them easily transition from simple telephony to a feature-rich Unified Communications solution to improve productivity in their business. You can even use the IP phone or VoIP service provider of your choice — talk about flexibility!

TRADITIONAL AND VOIP CALLS

By mixing VoIP with traditional calls, your business can optimize communications and save money without sacrificing features.

FAX

With Switchvox, fax is integrated so you no longer need a separate fax server. All faxes are delivered directly to your inbox! Plus, you can use the same number for calls and faxes.

VIDEO CALLING

Collaborating over long-distances has never been easier or less expensive since video phones are compatible with Switchvox.

RECORDING AND MONITORING

Great for training or auditing calls, Switchvox's recording and monitoring features are just one click away.

CHAT (INSTANT MESSAGING)

There's a built-in chat server so that your employees can instant message each other without compromising corporate security by using a public chat service.

MICROSOFT® INTEGRATION

Seamlessly integrates with all of the fundamental applications you work in everyday, like Outlook®, Word, Powerpoint®, and Excel®.

> If there's an appliance or SMB IP-PBX to beat, this is the one.
> Network World

> Digium Switchvox is a great choice for SMBs' VoIP needs.
> CRNTech

The company behind the next innovation in telecom.

Founded in 1999, Digium is the creator and primary developer of Asterisk, the world's most popular open source telephony platform. More than one million customers in 170 countries have deployed Asterisk-based systems. Digium is committed to ending the days of expensive, proprietary telecom with our award-winning line of Switchvox Unified Communication systems. Switchvox is much more than just an office phone system. It's a revolution in business communications, putting you in control of their most important asset in your business – your voice.

system for your business

PRESENCE

Your employees can work smarter when they have access to all office communications within a single screen. See who's in the office, and know who is on a call or away from their desk.

UNIFIED MESSAGING

With voicemail delivered to your inbox or mobile device, you can stay in communication wherever you are.

REAL-TIME INTERACTION

Switchvox's Switchboard has click-to-call, drag-and-drop transfers, and other features that make it easier than ever to communicate intuitively.

CONFERENCING

A built-in conference bridge allows all of your employees to manage their own conference rooms on-demand.

REPORTING AND CALL LOGGING

See details about all calls in your system. Custom, statistical reports can be scheduled and emailed to you automatically.

CALL QUEUES

Not just for the call center, Switchvox brings powerful call queuing functionality to even the smallest business that needs to efficiently handle inbound calls.

MOBILITY

Switchvox Mobile is an app for BlackBerry® and iPhone® that lets you stay connected with the most popular features of Switchvox right on your smartphone.

CRM INTEGRATION

Your sales and service organization will have customer information right at their fingertips whenever they get a phone call; what a productivity boost!

DEVELOPER FRIENDLY

Switchvox's XML-based Extend API makes it easy for a web application developer to integrate Switchvox with any web tool, without any Switchvox specific training.

Unified Communications 2011

Cloud Computing is More Reality than Hype

by Erik Linask

Despite the hype, media attention, and adoption to date, the cloud is still a relatively new technology with many questions still to be answered. Nevertheless, the concept of moving sensitive business information and applications into an off-premises environment managed by a third party is profoundly changing how businesses think about, purchase, and manage technology. That change has led technology leaders to invest in new strategies, both in their internal operational environments, and in how they approach their customers, with many of the leading technology vendors leading the charge.

ITEXPO Miami 2013 will host a Battle for the Cloud superpanel, including some of the biggest names in technology today, discussing the future of cloud computing and how it will impact the future of businesses. HP's representative on the panel, Director of Product Marketing Kiran Bellare, spoke with TMC in advance of ITEXPO to offer a sense of how the growth of cloud computing is changing the way businesses operate.

TMC: What is the most significant technology trend impacting the way businesses conduct operations today?
Kiran Bellare: Businesses increasingly need to accelerate the time to test, deploy and scale online applications. Globally distributed teams are also driving a need for increased collaboration and new, innovative applications. The ability to access these applications from mobile and tablet devices is now essential. All of these trends are driving increased usage of the public cloud.

TMC: How is cloud computing changing the way you operate your business?
KB: Moving production workloads to the public cloud and supporting the rapid deployment of new applications on an open source foundation has required us to build a new, much more agile and responsive organization.

TMC: Have security concerns around cloud computing been effectively addressed by the market, or is security still impediment to adoption?
KB: I don't think the cloud is necessarily any less secure than traditional hosting, although there are unique areas that need to be addressed. Well-known security compliance standards and monitoring tools apply to the cloud, but due diligence should include a cloud provider's proactive and reactive security plan. Security in the cloud should remain a priority, but does not need to be an impediment to adoption.

TMC: How has the unprecedented growth of social media changed the way you manage your customers?
KB: Social media has required us to have a more matrix-oriented approach to interacting with customers anytime, anywhere. More individuals across every job function are now more directly engaged with customers and potential customers to answer questions and incorporate feedback.

TMC: "Customer Experience" has become buzzword and 2013 may well become characterized as the Year of Customer Experience. What is your business doing to improve your customers' experiences?
KB: We are striving to provide our customers flexibility in development tools, an environment that fuels innovation and the expertise to help them accomplish their goals for the public cloud, regardless of complexity.

TMC: Keeping in mind that BYOD is now pervasive and no longer a phenomenon, will BYOD heavily influence your business in 2013 (whether from a security, policy or device or app management perspective) or have we moved beyond BYOD?
KB: I believe the industry has moved beyond BYOD as a policy decision given that it is now a de facto requirement for organizations rather than an option, but it will remain an ongoing concern with respect to security and app management.

TMC: BYOS – Bring Your Own Storage (or rather, Bring Your Own Cloud-based Storage) – may, in fact, now be the new major issue most enterprises and solutions providers need to deal with. Is your company prepared to deal with it, either at the carrier level or through independent vendors?
KB: Yes, HP has network and security management systems that can address BYOS as well as enterprise oriented partner solutions that can serve as alternatives to consumer cloud storage.

TMC: Should enterprises look to pre-empt BYOS issues by moving to carefully controlled cloud storage in 2013?
KB: This would certainly help, but like BYOD, organizations will still have to implement security measures, policies and solutions to address BYOS.

TMC: Unified Communications and VoIP have moved beyond the early adopter phase into the mainstream. What significant issues still remain that businesses must contend with as they determine when and how to migrate to IP-based communications?
KB: Like any business critical application, security, uptime and quality of service will be key factors.

TMC: Will 2013 be the year the laptop dies? Why or why not?
KB: Of course not. A well-designed laptop will continue to offer the best balance of performance, productivity and mobility for the widest range of applications. More people will own a laptop, tablet and smartphone device and choose which one to use based on where and how they wish to access their work and entertainment.

888Voip (Booth: 601)
P: 888-864-7786
www.888voip.com

888Voip is an industry leading VoIP hardware distributor. For years,VoIP resellers and integrators have relied on 888VoIP's knowledgeable and professional team to be their trusted advisor, most recently through our VIP (Value in Partnership) Partner Program. Manufacturers count on 888VoIP's experienced staff and network of certified reseller partners to expertly handle product distribution, technical support, warranty management, and solutions integration.

911 Enable (Booth: 613)
P/F: 514-745-2143 / 514-745-8616
www.911enable.com

At 911 Enable, our success is driven by a focus on surpassing customer expectations. Working with key partners such as Avaya, Cisco, and Microsoft, we deliver E911 management and call routing solutions that help organizations keep users safe while meeting E911 regulations.

ABP Technology (Booth: 322)
P/F: 972-831-1600 / 972-831-1416
www.abptech.com

ABP Technology is a Dallas, TX based, value-added distributor of IP Communications products and services marketed throughout North America, Latin America and the Caribbean. The ABP portfolio includes IP phones, IP PBXs, IP peripherals, IP cameras, IP video conferencing, mobility solutions with WiFi, DECT and Dual mode technology, engineering consultation services, technical support, IP training, provisioning and configuration services. ABP sells and supports proven Interoperable IP products based on Open Standards offering connectivity, security and mobility at optimal TCO with ease of deployment and high functionality. ABP's clients include channel partners, specialized VARs, Service Providers, government entities and educational institutions.

Acqueon Technologies, Inc. (Booth: 516)
P/F: 303-495-2411 / 720-528-7807
www.acqueon.com

Acqueon specializes in developing products and solutions for the Contact Center industry. Our software solutions handle millions of transactions every day and are implemented across the Healthcare, Insurance, Telecom, Finance and Govt/Education verticals across the world.

ADTRAN (Booth: 300)
P/F: 256-963-8000 / 256-963-8699
www.adtran.com

ADTRAN is a leading global provider of next-generation networking solutions for Enterprise Communications, Cloud Connectivity, and Virtual Mobility. Widely deployed by carriers, distributed enterprises and small- and medium-sized businesses (SMBs), ADTRAN's solutions enable voice, data, and video. Products showcased at IT Expo will include: Virtual Wireless LAN, Unified Communications, IP PBX and Converged IP Telephony systems, business-class SIP phones, IP business gateways, managed PoE and Gigabit switches, access routers, and Wireless Access Points.

Aheeva Technology (Booth: 908)
P/F: 514-223-2581 / 514-448-4906
www.aheeva.com

Created in 2000, Aheeva is specialized in products and services within superior technological solutions for contact centers. The Aheeva software suite gathers all the features required for efficiently managing-contact centers: intelligent distribution of inbound and outbound calls, varied and high-performance dialing modes (predictive, progressive, preview), multilingual interface, unlimited number of detailed reports, unlimited number of routing scripts, quality control (remote and real-time listening), audio and video call recording, audio and video live monitoring, staff management... These applications will make your company virtual, for they are integrated into a simple, completely flexible platform, accessible from anywhere, wherever an Internet connection is available. With AheevaCCS, you have the possibility to increase your contact center's return on investment, regardless of its size, to achieve a superior customer service, and to gain higher profitability.

AireSpring (Booth: 423)
P/F: 888-899-3021 / 818-786-9225
www.airespring.com

AireSpring is the leader in next generation IP communications and Managed Network Services. Voice, Internet, MPLS, Conferencing, Cloud Hosted IP PBX and industry leading compensation structure make AireSpring a #1 competitor.

ALOE Systems (Booth: 620)
P/F: 905-944-8603 / 905-944-1023
www.aloe-systems.com

ALOE Systems is a vendor of carrier-grade softswitch solutions and service platforms for traffic management in VoIP networks. We develop software products that can be run on standard hardware and perform VoIP traffic switching, routing, billing, and border control. ALOE Systems products can be easily integrated into any carrier's network.

Alteva (Booth: 729)
P/F: 877-258-3722 / 845-986-6699
www.altevatel.com

Headquartered in Philadelphia, Alteva delivers cloud-based Unified Communications solutions, providing the most reliable network and the most responsive and proactive customer service. Alteva provides businesses with all their communications needs: Call Routing/VoIP, Messaging and Web-based Collaboration through Microsoft Communication Services, Fixed Mobile Convergence and Advanced Communications Applications for the desktop.

Alvaco Networks, Inc (Booth: 331)
P/F: 407-574-2017 / 407-657-7262
www.alvaco.com

Internet load balancer, internet bandwidth aggregation, vpn bonding, outbound and inbound load balancing. multi wan routers.

Asteria Solutions Group (Booth: 1009)
P/F: 256-705-0277 / 256-705-0280
www.asteriasgi.com

Asteria Solutions develops applications using the open source Asterisk® platform. Deployments include messaging and notification systems, custom IVRs, provisioning/activation systems, and various applications requiring a telephony component. Asteria markets commercial products for call centers, auto-dialing, voicemail replacement systems, and enterprise PBXs, and offers 24 x 7 support services for Asterisk.

Commetrex Corporation (Booth: 612)
P/F: 770-449-7775 / 770-242-7353
www.commetrex.com

Are you a VoIP service provider or carrier with FoIP problems? If so, Commetrex has the end-to-end solution you need: Smart ATA™ and BladeWare™, both based on Smart FoIP®, patent-pending technology from Commetrex. Smart ATA is the industry's only ATA with T.38 that actually has a call-success rate over carrier networks that's on a par with PSTN fax. Smart ATA will allow you to stop saying to your subscribers, "Keep your POTS lines for fax." Instead, they will press send, walk away, and when they return, the fax has been sent … no ifs, ands, or buts. In addition, we're introducing a new product, FaxTap for SIP™. This is the tool you've been waiting for to effectively diagnose your FoIP-network problems. Commetrex, the inventor of terminating T.38, is the industry's leading developer of fax technologies. Commetrex serves telecom developers, enterprise-fax OEMs, and VoIP service providers with its array of products, including T.38 Fax Relay, TerminatingT38™, Multi-Modal Terminating Fax, BladeWare, and now with Smart FoIP.

Commlogik Corp. (Booth: 806)

Interactive Intelligence (Booth: 409)
P/F: 317-872-3000 / 317-872-3000
www.inin.com

Deliberately Innovative All-in-One Communications for Business. Most solutions for unified communications unify systems, applications and devices from multiple vendors. Interactive Intelligence takes a more intrinsic approach. With a standards-based IP platform we built from the ground up, and with our integrated application suites for the contact center, unified communications, and business process automation, we deliver true unified IP business communications. Complete with software, hardware, consulting, implementation, support and education, our on-premise and cloud-based solutions extend value that traditional "UC" can't. Our multichannel software platform is deployed on standard servers — simplifying infrastructure and administration. Manage calls, emails, faxes and chats, as well as SMS, business objects, and social media. Integrate to business systems and end-user devices, and do so broadly and reliably with a solid platform foundation. Move to IP networks, voice over IP (VoIP) and the cloud with a clear path architected on the SIP standard, and support remote locations and mobile employees with ease. And by leveraging our platform to automate business processes, people and work together are brought together throughout an organization with pin-point precision. At Interactive Intelligence, it's what we do… and why enterprises worldwide have chosen us since 1994.

IPsmarx Technlogy Inc. (Booth: 631)

P/F: 877-478-6471 / 412-379-1009
www.voipinnovations.com

VoIP Innovations is the industry's leading Wholesale and Private Label VoIP provider, managed by the industry's leading BackOffice, Titanium III. VoIP Innovations delivers unprecedented aggregation, automation, and innovation to the ITSP and reseller communities.

VoIPshield Systems Inc (Booth: 640)
P/F: 613-591-6589 / 613-482-8543
www.voipshield.com

VoIPshield Systems (www.voipshield.com) secures telecommunication infrastructure by providing specialized products, services, and engineering solutions for Telephony Fraud Prevention and Unified Communications Security. VoIPshield is a Go-To Company for ensuring the security of your telephony network and preventing financial losses due to PBX hacking and other abuses. Based on a decade of pioneering effort in VoIP security, the Company offers leading edge products, know-how and expertise to protect your operations. VoIPshield: "Assess – Protect – Monitor" for your peace of mind.

Voipswitch (Booth: 436)
P/F: 442081366000 / 442079002207
voipswitch.com

VoipSwitch softphones are multi functional VoIP applications for PCs and cover all mobile platforms. The software is an ideal solution for an established telecom providers planning to extend their offering, as well as for those who just enter the VoIP business. The softphones can be seamlessly integrated with any Class 5 or IMS platform including Voipswitch. With the assistance of VoipSwitch Engineers the implementation of mobile and PC softphones becomes extremely easy and time-efficient. VoipSwitch softphones have excellent video and voice quality, and a multitude of functions with clear design and ease of use for end-users. The applications are constantly updated, and enriched with the latest features, which makes them the most competitive products in the VoIP market. Our softphones solutions can be white-labeled, and branded with the customer's logo and design.

Voxbone (Booth: 717)
P/F: +3228080000 / +3228080001
www.voxbone.com

Voxbone is the market leader in providing worldwide geographical, toll-free and iNum® telephone numbers, enabling Internet communications services providers, global carriers, national operators and enterprises to extend the reach of their voice services internationally, rapidly and with minimal costs. The company delivers high-quality inbound communications (often referred to as direct inward dialing, or DID) from more than 50 countries and more than 4,000 cities around the world.

Voxvalley Technologies (Booth: 408)
P/F: +9140 27811023 / +9140 27811023
www.voxvalley.com

VoxValley is a B2B company started in 2009, which caters to the global VoIP industry through its outstanding range of Mobile VoIP Dialers, SIP Soft switches and other remarkable VoIP applications. The company offers VoxDialer- an application to make VoIP calls from mobile, MoSIP- Mobile VoIP Dialer, VoxPC - a PC2Phone dialer application; and VoxBridge- a tunneling and bandwidth saver product for VoIP blocked areas. Presently, the company caters to the global VoIP Industry through its resellers spread across 25 countries including Japan, Malaysia, Singapore, Germany, France, U.K. and India.

Wilson Electronics (Booth: 210)
P/F: 435-673-5021 / 435-656-2432
www.wilsonelectronics.com

Wilson Electronics-Improving your cellular signal! Wilson Electronics, Inc., has been a leader in the wireless communications industry for more than 40 years. The company designs and manufactures a wide variety of cellular signal boosters, antennas and related components designed to significantly improve cellular communication in mobile, indoor, and machine-to-machine(M2M)applications.

Windstream (Booth: 506)
P/F: 866-445-5882 / 585-340-2507
www.windstreambusiness.com

Windstream Corp. (Nasdaq: WIN) is a nationwide, enterprise-focused communications and technology service provider, offering data, voice, network and cloud services. Windstream has more than $6 billion in annual revenues and is listed on the S&P 500 index. For more information, visit www.windstream.com.

Xorcom (Booth: 707)
P/F: +972 4 995-1999 / +972 4 995-1988
www.xorcom.com

Xorcom develops complete telephony solutions based on an open source platform for commercial installations. Products range from USB-powered telephony interfaces to all-in-one hybrid IP-PBX appliances that support both VoIP and traditional PSTN. Our multi-point video conferencing capability, available as a stand-alone MCU or embedded in our IP-PBX, makes this technology affordable to small and medium-sized businesses. We also offer the only MICROS-Fidelio certified Property Management System (PMS) interface for Asterisk. Xorcom designs enterprise-grade reliability into each of its products. A variety of utilities provide backup and

restore, immediate recovery, and a full redundancy solution for the entire PBX to maximize uptime and complement the functionality of Xorcom's full-featured business telephony solutions.

Yealink Network Technology Co.,Ltd. (Booth: 701)
P/F: 86-592-570-2000 / 86-592-570-2455
www.yealink.com

Founded in 2001, Yealink, the Global Top 5 SIP Phone Supplier, has been focusing on VoIP products characterized by reliable quality, easy deployment and affordable price for more than 10 years. Today customers across various industries from over 140 countries rely on Yealink as the backbone of global collaboration to extend the value of network communication. For more information, please visit: www.yealink.com.

Yeastar (Booth: 806)
P/F: +86-592-5503309 / +86-592-5503307
www.yeastar.com

Yeastar specializes in the development and manufacture of IP-PBX products and is committed to provide new generation technology products in the field of enterprise communications. Yeastar also provides cost-effective solutions from small SOHO up to SME PBX devices, and also provides products for ITSPs to penetrate the enterprise market. With a professional and high quality engineering team, Yeastar designs products for worldwide applications and guarantees long-term reliability and stability. Yeastar constantly follows users' requirements and reacts to demands for implementing new features and options in their products. Yeastar welcomes cooperation requests in the IP telephony market and will strive to obtain a win-win situation for all. Yeastar is committed to a high quality office communication experience for all users.

*Conference sessions/speakers are subject to change.

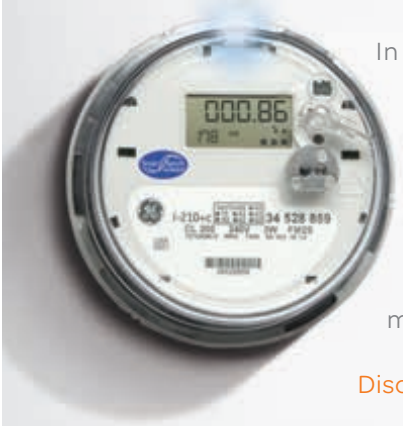
Rethink Possible®

In here, meters keep in touch, so your crews don't have to.



In the network of possibilities, meters report usage in real time. The power grid monitors itself to identify problems before they become outages. And utilities put resources where they're needed most. As the only communications provider offering complete smart grid solutions, AT&T is a partner you can rely on to manage your data, so you can focus on managing your power grid.

Discover what AT&T Smart Grid Solutions can do for you at
att.com/smartergrid

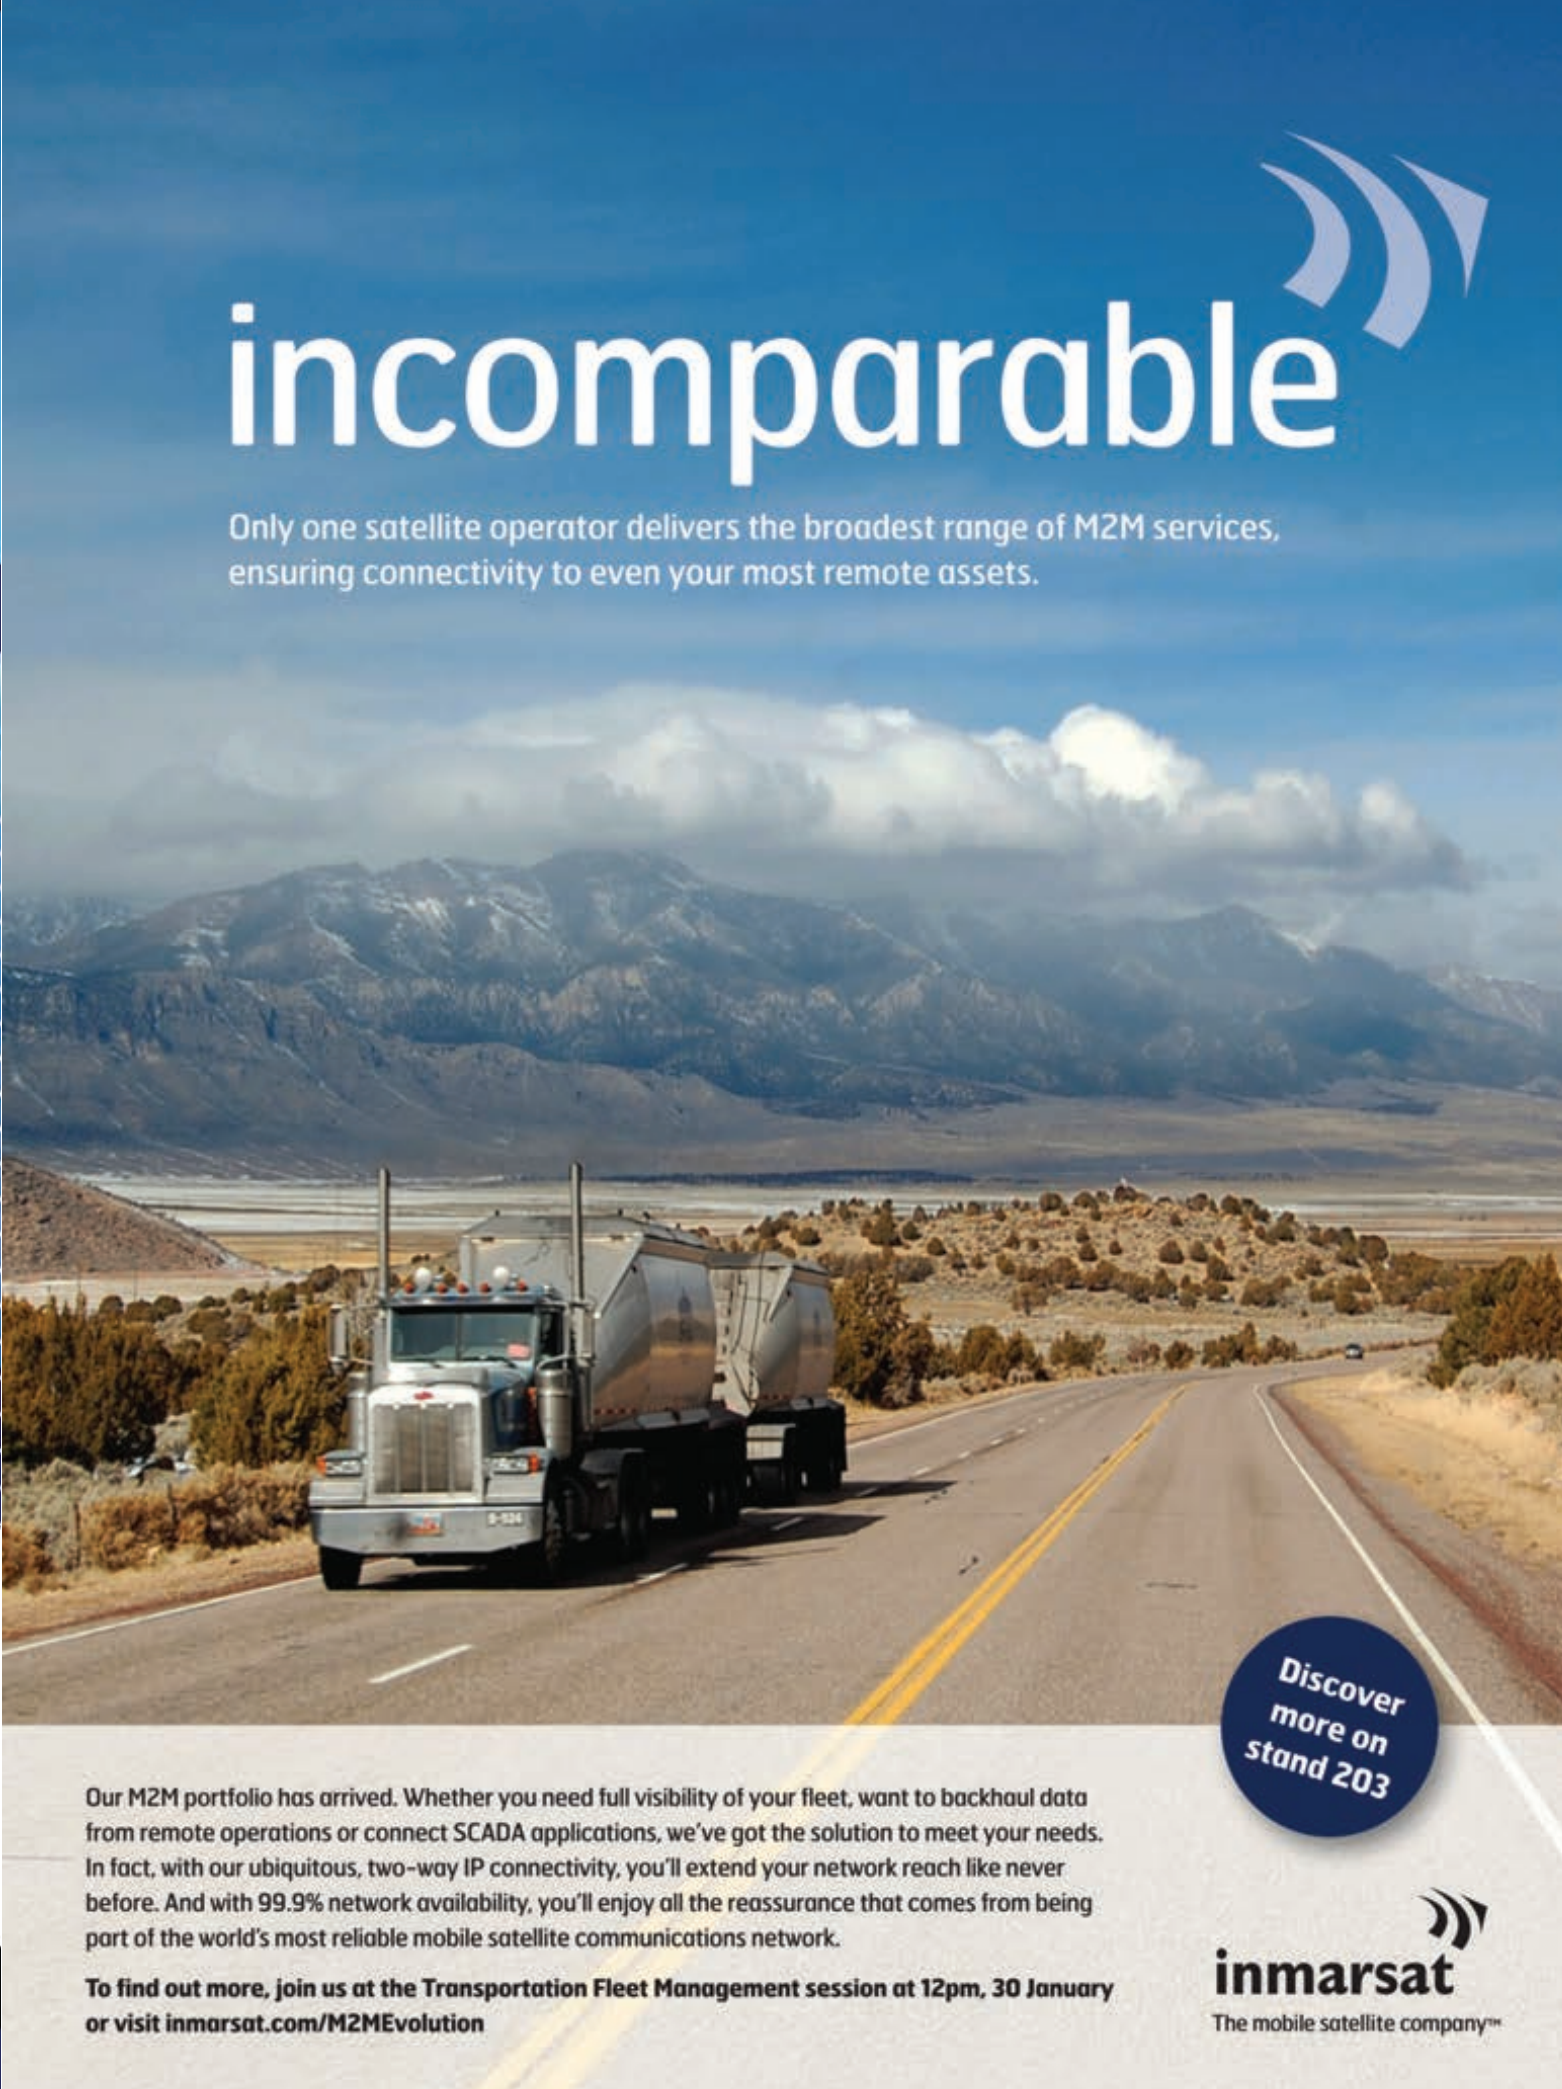
#m2mevolution



Our M2M portfolio has arrived. Whether you need full visibility of your fleet, want to backhaul data from remote operations or connect SCADA applications, we've got the solution to meet your needs. In fact, with our ubiquitous, two-way IP connectivity, you'll extend your network reach like never before. And with 99.9% network availability, you'll enjoy all the reassurance that comes from being part of the world's most reliable mobile satellite communications network.

To find out more, join us at the Transportation Fleet Management session at 12pm, 30 January or visit inmarsat.com/M2MEvolution

ILS technology

Here's a way to make business decisions.

May we suggest another?

If your M2M application doesn't integrate directly into your enterprise IT systems, you're rolling the dice when it comes time to make critical business decisions. That's why ILS Technology developed the deviceWISE M2M Application Platform with enterprise IT in mind.

Whether you depend on SAP, Oracle, IBM, or countless others, deviceWISE speaks the language like a native, giving you the information you need to make better choices about the future of your business.

It's the only ready-to-use, off-the-shelf cloud service for efficient, secure connectivity between your business systems and your assets. So don't gamble with the future of your business. Visit deviceWISE.com today and be certain of your next decision.

deviceWISE

Get the data you need to be sure.

www.koretelematics.com

KORE is the largest M2M network service provider offering unified control and management for cellular and satellite network services in 180+ countries worldwide. KORE empowers application solution and enterprise customers to efficiently deliver M2M solutions globally. KORE offers a range of technologies — including GSM, CDMA and satellite services — ensuring the greatest possible reliability and coverage. For more information, visit www.koretelematics.com.

ORBCOMM (Booth: 212)
P/F: 703-433-6300 / 703-433-6400
www.orbcomm.com

ORBCOMM is a leading global satellite data communications company focused on M2M communications. By means of a global network of low-earth orbit (LEO) satellites and accompanying ground infrastructure, ORBCOMM's low-cost and reliable two-way data communication services track, monitor and control mobile and fixed assets in four core markets: commercial transportation; heavy equipment; industrial fixed assets; and marine/homeland security.

Spireon (Booth: Sponsor)
P: 949-422-7103
www.spireon.com

Spireon connects companies to their mobile assets and workforce through game changing MRM platforms, giving them the power to manage actionable business intelligence. Spireon's revolutionary, new multi-vertical M2M intelligence platform – called NSpire - provides real time analytics, through a scalable architecture and supports over 1.5 million active subscribers today. The NSpire intelligence platform collects rich data from its patented array of GPS products and delivers actionable business intelligence through industry brand for automotive dealers, lender services and delivery fleets, healthcare and transportation and logistics customers.

ThingWorx (Booth: 119)
P/F: 610-594-6200 / 610-594-6200
www.thingworx.com

ThingWorx provides the first platform designed to efficiently build and run the M2M applications of today's connected world. Businesses use the ThingWorx platform to rapidly deliver innovative applications and connected solutions across markets ranging from manufacturing, energy, medical, and food, as well as in emerging Internet of Things applications, including smart cities, smart grid, agriculture, and transportation.

Verizon (Booth: 217)
P/F: 240-568-1528 / 240-568-2528
www.verizonwireless.com

Verizon connects people, information and systems. Our technology and business solutions support global mobility and facilitate informed decision-making, by providing critical information across enterprises and geographies. Verizon 4G LTE, America's fastest, most reliable 4G network, is engineered to support the apps and devices of the future, while enabling better business outcomes today.

Vodafone (Booth: 211)
m2m.vodafone.com

Vodafone Machine to Machine connects previously isolated machines or devices wirelessly to the internet delivering new functionality and enhanced services without the need for human intervention. M2M technology makes common appliances more intelligent by enabling them to feed useful data back to the service provider or manufacturer to achieve a better customer experience. Supported by 20 years' experience and 250 dedicated staff, Vodafone's global M2M platform makes it easy for businesses to centrally manage M2M deployments across multiple territories, with greater control and at a lower cost than previously possible. Vodafone's M2M solutions operate principally in the automotive, healthcare, logistics, utilities, and remote maintenance and security sectors

Wilson Electronics (Booth: 210)
P/F: 435-673-5021 / 435-656-2432
www.wilsonelectronics.com

Wilson Electronics-Improving your cellular signal! Wilson Electronics, Inc., has been a leader in the wireless communications industry for more than 40 years. The company designs and manufactures a wide variety of cellular signal boosters, antennas and related components designed to significantly improve cellular communication in mobile, indoor, and machine-to-machine(M2M)applications.

Slow cellular data speeds hindering the function of your M2M device?

If this happens to you, we can help.

Integrate Wilson Signal Boosters into your M2M devices to provide a strong, reliable cell signal.

Aheeva Technology (Booth: 908)
P/F: 514-223-2581 / 514-448-4906
www.aheeva.com

Created in 2000, Aheeva is specialized in products and services within superior technological solutions for contact centers. The Aheeva software suite gathers all the features required for efficiently managing-contact centers: intelligent distribution of inbound and outbound calls, varied and high-performance dialing modes (predictive, progressive, preview), multilingual interface, unlimited number of detailed reports, unlimited number of routing scripts, quality control (remote and real-time listening), audio and video call recording, audio and video live monitoring, staff management... These applications will make your company virtual, for they are integrated into a simple, completely flexible platform, accessible from anywhere, wherever an Internet connection is available. With AheevaCCS, you have the possibility to increase your contact center's return on investment, regardless of its size, to achieve a superior customer service, and to gain higher profitability.

Asteria Solutions Group (Booth: 1009)
P/F: 256-705-0277 / 256-705-0280
www.asteriasgi.com

Asteria Solutions develops applications using the open source Asterisk® platform. Deployments include messaging and notification systems, custom IVRs, provisioning/activation systems, and various applications requiring a telephony component. Asteria markets commercial products for call centers, auto-dialing, voicemail replacement systems, and enterprise PBXs, and offers 24 x 7 support services for Asterisk.

ConnectWise (Booth: 911)
P/F: 813-868-5379 / 813-463-4700
www.connectwise.com

The ConnectWise cloud-based and on premise solution for IT Solution providers manages customers and contacts, scheduling, ticketing, time, invoicing, projects, agreements, quoting, sales, marketing, finance, procurement and inventory, reporting and more. The ConnectWise platform offers a 360-degree view of the IT provider's organization and its customer, helping to streamline business operations and achieve greater efficiency and profitability.

Digium, Inc (Booth: 901)
P: 256-428-6000
www.digium.com

Digium, Inc. provides Asterisk® software, telephony hardware and Switchvox business phone systems that deliver enterprise-class Unified Communications (UC) at an affordable price. Digium is the creator, primary developer and sponsor of the Asterisk project, the world's most widely used open source communications software. Asterisk turns an ordinary computer into a feature-rich communications server. A community of more than 80,000 developers and users worldwide uses Asterisk to create VoIP communication solutions in more than 170 countries. Since 1999, Digium has empowered developers to create innovative communications solutions based on open standards and open source software, providing an alternative to proprietary phone systems.

Majuda Corporation (Booth: 1005)
P/F: 561-981-0119 / 561-431-3928
www.majuda.com

Majuda Corporation designs, develops and sells advanced Call Recording and Quality Management Software Solutions to small, medium and Enterprise size business through a network of Authorized Resellers and Distributors throughout the world. Our products are deployed globally in Contact Center, Financial, Customer Service and Compliance Oriented business. We provide a range of innovative, cost-effective products including call recording, quality management, screen capture and agent scoring.

New Rock Technologies,Inc. (Booth: 909)
P/F: 0086-21-61202700-205 / 0086-21-61202704
www.newrocktech.com

New Rock is one of the most respected and largest manufacturers of voip gateways and IPPBX, targeting on SMB market. Our voip gateway products have been widely deployed by China mobile in IMS based IP telephony network. As an original manufacturer and designer, New Rock's voip products provide competitive advantages in the quality, the cost, and the critical features and functions that is important to the applications in carrier and enterprise system integrations.

Obihai Technology, Inc. (Booth: 917)
P/F: 408-890-6000 / 408-228-5962
www.obihai.com

Obihai is bringing its VoIP endpoint products and technology together with the offerings of its reseller, service provider and system integrator partners to evolve today's end-user or service provider customer into tomorrow's super-loyal subscriber. Through partnering with Obihai Technology, a service provider or telecommunications equipment reseller can extend the many useful and powerful advantages associated with OBi hardware and software. New features and services with a greater return on investment are realized by both the service provider and their subscribers resulting in greater savings, profits and in general, a more long-standing relationship.

OrecX (Booth: 902)
P/F: 312-945-7622 / 312-895-5220
www.orecx.com

OrecX provides open source VoIP recording solutions at a fraction of the cost of proprietary recording applications. OrecX is the primary developer/sponsor of the Oreka open source call recording project (www.oreka.org) – with over 110,000 users across 160-plus countries. OrecX is used by contact centers and financial institutions (for customer service and compliance), and business VoIP providers (for revenue generation). http://www.orecx.com/.

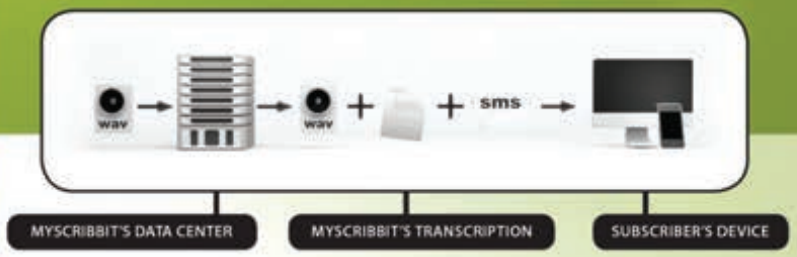
Enhance your voice service offering by including MyScribbit™ voicemail transcription today.

my scribbit
Transcribes your voicemails

BEST OF SHOW 2012 ITEXPO Austin, TX

From the nations leading wholesale solutions provider, Vitelity, a robust voicemail transcription service for your business and residential customers. With MyScribbit,™ your customers will still get an email with the audio file of their voicemails but now with the messages transcribed and added in the text body of the email. In addition, the transcribed voicemails can also be sent to your subscribers mobile phones as an SMS text message.

Learn more about MyScribbit™ at **booth 301** or by visiting **www.myscribbit.com**.



We're still your source for Origination, Termination, local and international DIDs, Toll Free, E911, vFax, SMS, and PBX hosting.

- ***ITEXPO's Most Innovative New Product for 2012***
- ***Accurate transcription***
- ***Deep wholesale discounts***
- ***Universal - Works with any PBX that sends voicemails as an audio file***
